Special Issue on Language, Knowledge, and Social Intelligence

Tsinghua Science and Technology started publication in 1996. It is an international bimonthly academic journal sponsored by Tsinghua University, and aims at presenting state-of-the-art scientific achievements in computer science and other IT fields. It enters into IEEE Xplore Digital Library from 2012, and adopts the open access mode in 2013. In 2015, *Tsinghua Science and Technology* is indexed in the Science Citation Index Expanded.

Nowadays, language computing, knowledge learning and social intelligence are among the most active research and development areas due to the proliferation of big data and social media. This special issue on Language, Knowledge and Social Intelligence is devoted to gather and present innovative research, systems and applications that address the challenges in the broad areas of language, knowledge and social intelligence, presenting a platform for researchers to share their recent observations and achievements in the field. Specific topics for this special issue include but are not limited to:

- Fundamentals of Language Computing
- Deep learning for Language, Knowledge and Social Network
- Crowdsourcing and Social Intelligent
- Knowledge Representation and Acquisition
- Knowledge Evolution and Reasoning
- Cognitive Modeling for Natural Language Processing
- Entity Recognition, Resolution and Linking
- Q&A and Semantic Search
- Knowledge Integration and Sharing
- Social Network Analysis and Mining
